ATC
Alarm Technician Course

Fall 2020 - Summer 2021 Calendar

The Alarm Technician Course (ATC) is available four times per year. Designed to fit individual schedules, the program can be successfully completed from home, work, or even while travelling. You control your study hours, working at the time and place that's right for you.

The ATC course is paced, meaning there are scheduled start and end dates, and exam deadlines within each course. Courses are also self-guided—meaning you are never required to be online at a particular time and you can finish as quickly as you like.

The student must achieve 75 per cent or higher on the exam which must be completed by the last day of the course. No course or exam extensions will be granted.

Full course description and registration links are available in the education section on canasa.org.
