

Effective Video Surveillance System Design

October 17, 2019
Burlington, ON

CANASA Golden Horseshoe Regional Council Presents **Effective Video Surveillance System Design**

Thursday, October 17, 2019

A candid discussion around designing an effective Video Surveillance System (VSS) based on common sense best practices. You must get the basics right. The basics include the strengths and limitations of VSS. Many of the shortcomings of VSS are due to people, not hardware. We will center our talking points on the primary objective of VSS system design ensuring operational requirements are met to the satisfaction of end-users.

Location:

Holiday Inn Burlington Hotel & Conference Centre
3063 S Service Road
Burlington, ON L7N 3E9
