

Installation And Configuration Of Video Appliance Has Never Been Easier - Come Spend The Day With Us

ANIXTER

February 17, 2010

Intrinsa products enable security departments and installers to do more with less. All of our systems are built to be solutions to physical security requirements, and are based upon our industry-leading, patented Video Data Management & Retention (VDMR) technology. Each delivers simple, powerful and affordable physical security systems that are designed to meet new all-IP surveillance needs, to extend the life of existing CCTV systems, or to deliver a hybrid, future-proof mix of existing analog and new IP-based technology.

Anixter & Intrinsa invites you to a day of Sales & Technical training increasing your skills in the rapidly changing world of Video Data Management and Retention.

Presented by: Bill Davies, Sr. Systems Engineer and Leon Rutkowski, Regional Manager, both with Intrinsa

Location

Anixter Toronto
200 Foster Crescent
Mississauga, Ontario
Training Room
8:00 a.m. – 4:00 p.m.

Continental breakfast and lunch will be served
