Alarm Technician Course Level 2, Module 1 Advanced Control Panel Features

This course is ideal for newcomers to the industry or those with years of experience. This program includes information on wiring supervision such as double end-of-line resistors and multiplex loop technologies. Outputs, programmable functions and auxiliary power supply are also covered. A section is dedicated to overview partitioning, telephone interface, 2-way audio, auto-arming, X10 automation and event buffer. The final sections give an overview of the SIA CP-01 and ULC-S302 Standards.

Benefits

- Learn about advanced features of control panels
- Learn at your own pace
- Interactive CD format
